

ID 03ACM

Age 09/01/1974

Gender M F**Initial problem**

- psychorelational sense of social inadequacy, repressed anger
 physical frequent prostatitis and gastritis
 specific problems

Period of treatment Start date 18/09/14 End date 18/03/15

Mode of treatment local remote

Info about the system detailed summarized none

Info provided from the patient

- by videotaped interview during the evaluation
 by photographic documentation no information provided
 by psychological interview

Attitude before treatment

- enthusiastic trusty hopeful doubtful incredulous opposing
 staunch collaborative accepting indifferent negative

Attitude during the therapy

- receive and reads the reports provides written feedback indifferent
 does not read the reports generally collaborative
 provides verbal feedback generally passive

Characteristics of treatment

- The patient knows the way of treatment:
 yes
 no
 Protocol:
 psychic
 physical
 spiritual
 remedies
 Discussion about the results:
 after each treatment
 after a certain number of treatments
 occasional, after the patient request
 occasional, after our request
- Frequency of delivery:
 daily
 more times a week
 weekly
 fortnightly
 monthly
 Refreshing of the evaluation
 weekly
 fortnightly
 monthly
